DETAILED ACTION

Election/Restrictions

The restriction/election of record is maintained for the reasons of record.

The invention is drawn to many different compounds which are encompassed by the claimed structure. The compounds vary distinctly in their structures and functions. Thus, an individual search is required of each individual compound. To do so, would be an undue burden on the Patent Office since so many compounds are encompassed by the claimed structure, i.e. -OP, etc. Therefore, as part of the election of one of the groups as the elected invention, the elected species, compound 73 of Figure 2, is what the elected invention will be limited to and thus what the examination on the merits will be limited to. This requirement is not to be taken as an election of species, but rather as an election of a single invention, since each compound is assumed to be a patentably distinct invention.

The compounds that do not read on the elected invention (compound 73 of Figure 2) remain withdrawn from further consideration by the examiner as being drawn to non-elected inventions.

Allowable Subject Matter

The compound 73 of Figure 2 is allowable.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
